

SlideshowFX

Presentations evolved !

Thierry Wasylczenko

 @twasy/

Sick of PPTs?

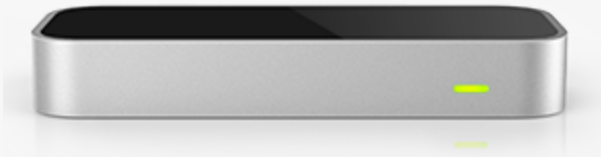

Have you
seen HTML5
presentations
?

**Try
something
new !**

- Create your HTML5 presentations easily
- Get a template or create one
- Extend it with your favorite JS libraries
- Discover a new world of possibilities !

- Change slides with a swipe
- Show a pointer with your finger
- Click using your finger
- <https://www.leapmotion.com/>

Chat with your audience

7

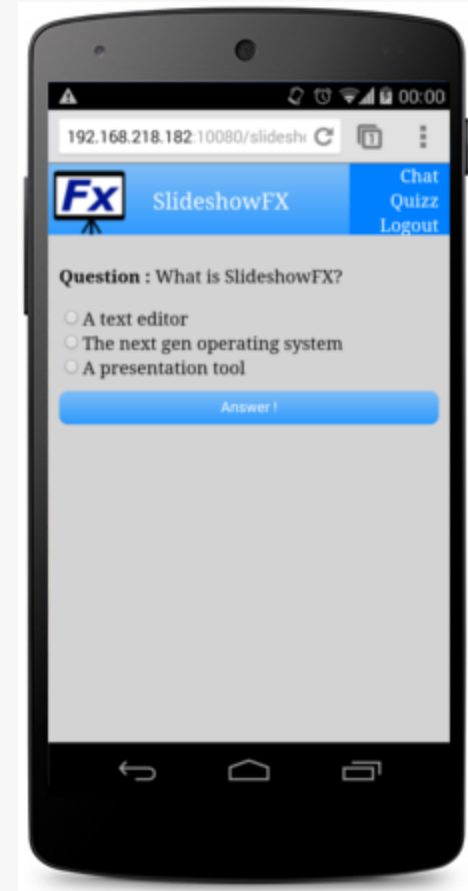

- Your audience sends you messages with their smartphones
- Everybody sees them
- Answer to them and they see it !

Ask them !

8

- Create quizz like on the next slide
- They can answer from their smartphones
- View the results live !

Quizz time !

What is SlideshowFX?

- A text editor
- The next gen operating system
- A presentation tool

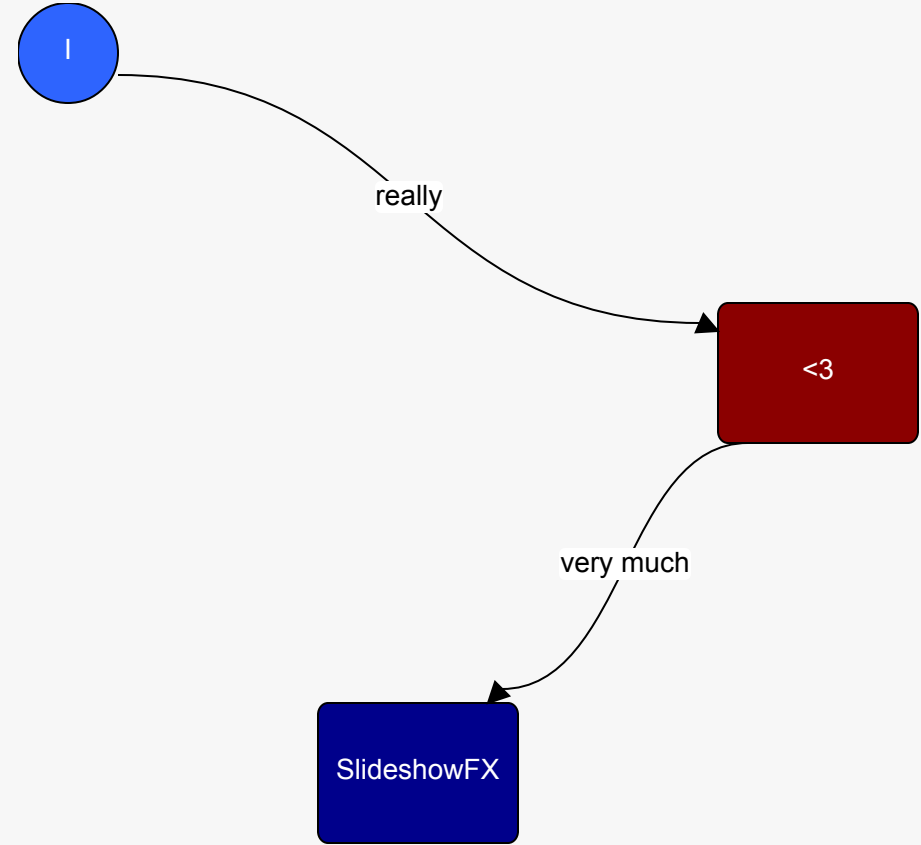

Start

Stop

Loving diagrams?

10

- You can use [JointJS](#)
- Beautiful JavaScript diagram library !
- And drag elements !

Put some code

11

- Put some code using a highlightinh library
- You can use [highlight.js](#)
- Forget about how to color your code!

```
public class Foo {  
  
}
```

Loving videos?

12

- Embed videos from the web !
- Yes, you are doing HTML5 presentation!

```
<iframe width="500" height="281" src="https://www.youtube.com/embed/8" data-bbox="508 305 998 745">
```

Save your presentations to

13

Why don't execute some Golo code snippet?

14

```
println("Hello from SlideshowFX")
```

Execute code

Or some Java?

15

```
System.out.println("Hello from SlideshowFX");
```

Execute code

Enjoy
